

PATENT

EXTRAPALLIAL FLUID OF MOLLUSCS, METHOD OF OBTAINING SAME, FORMULATION AND USE THEREOF

SIERA SA

ABSTRACT

The invention relates to a fluid preparation method comprising the recovery of the fluid that is located between the shell and the body of a mollusc. The invention also relates to the liquid obtained using said method, and to the use thereof in the pharmaceutical field, in particular in order to improve cutaneous healing, to regenerate tissues or to promote osteogenesis or bone mineralization. The invention further relates to compositions, particularly pharmaceutical compositions, medical devices or food supplements containing same.
